

Marine Managed Areas to Protect Marine Life: North Atlantic Data and Version History

Provided by: ProtectedSeas, Last Update: December 13, 2018

Current Version: 1.18.12.0

Data Sources:

The NOAA MPA Center 2014 dataset was the starting source for our North Atlantic dataset of marine managed areas. We also included data from:

- NOAA Fisheries - Greater Atlantic Region
- U.S. National Park Service
- U.S. Fish and Wildlife Service
- U.S. Coast Guard
- U.S. Department of Agriculture
- Connecticut Department of Energy and Environmental Protection
- State of Maine Department of Marine Resources
- Massachusetts Office of Energy and Environmental Affairs, Department of Fish and Game
- Massachusetts Board of Underwater Archaeological Resources
- Massachusetts Department of Conservation and Recreation
- Massachusetts Division of Marine Fisheries
- New Hampshire Department of Fish and Game
- New Hampshire Division of Parks and Recreation
- Rhode Island Department of Environmental Management, Division of Fish and Wildlife

Some of the marine managed areas in the North Atlantic not in NOAA's 2014 dataset but included in ours are:

- a. Shrimp Sanctuaries
- b. Species- or gear-specific fishery year-round and seasonal closures
- c. National Wildlife Refuges
- d. State Parks
- e. Gear Restricted Areas

Our dataset does not include Critical Habitats, since they restrict activities of Federal agencies but do not include additional restrictions for mariners.

Review Status:

This dataset has not yet been reviewed by Managing Authorities

Version History:

The first release, Version 1.16.11.0, was on 11/1/2016.

Version 1.17.1.0 was released on 01/01/2017.

Version 1.17.2.0 was released on 02/01/2017.

Version 1.17.3.0 was released on 03/01/2017.

Version 1.17.4.0 was released on 04/01/2017.

Version 1.17.5.0 was released on 05/01/2017.

Version 1.17.7.0 was released on 07/01/2017.

Version 1.17.8.0 was released on 08/01/2017.

Version 1.17.9.0 was released on 09/01/2017.

Version 1.17.11.0 was released on 11/01/2017.

Version 1.18.03.0 was released on 03/01/2018.

Version 1.18.06.0 was released on 06/01/2018.

Version 1.18.12.0 was released on 12/13/2018.

Definitions:

Existing Areas: Sites that exist in the NOAA 2014 dataset and that AI verified are unchanged (i.e. same boundaries and are still protected under current regulations).

Updated Areas: Sites that have had their metadata or boundary information updated since the last version.

New Areas: Sites that have been added to the dataset since the last version (either digitized by AI based on boundary information in regulations or obtained from Managing Authority). *Naming convention:* For sites not included in NOAA's 2014 dataset, we assigned a Site ID. The ID starts with 'AI' and formulates an acronym with the 'Name'. If there is seasonality, then we indicate it is seasonal, and the dates if they are available.

Removed Areas: Sites that were removed from NOAA's list and incorporated into new Areas based on regulations.

Entry/Stopping/Anchoring/Landing Prohibited Areas: When public access to a marine managed area is completely prohibited, this area will be displayed as a no-entry area. However, many marine managed areas contain subareas that restrict or prohibit public access. To the extent possible, these restricted areas have either been separated out and are individually displayed as no-entry areas, or the access restrictions are indicated in the restrictions text. Further, any areas with seasonal closures will not be displayed as a no-entry areas; instead the seasonal closures will be indicated in the restrictions text. Other restricted activities, such as diving, stopping, anchoring, and landing, will follow the same method.

> FIRST RELEASE: 11/1/2016

Existing Areas

| Site ID | Site Name |
|---------|--|
| CT13 | Bride Brook Wildlife Management Area |
| CT14 | Charles E. Wheeler Wildlife Management Area |
